We are an Afghan refugee living already for 10 months in Moria Camp and a photo editor currently living in The Netherlands. One takes the images, the other edits them. We are working in this collaborative project not just to bring awareness but to speak directly to the policy makers in Europe to demand a solution. We will explain our stories. We want you see and hear us but at the same time we will preserve the intimacy and right to privacy of our children. We will never use real names and the subjects will remain unidentified. We need your help. Go out, speak to your neighbors, to your friends, start a demonstration, ask and demand a solution to the policy makers from your environment for a change.
