

Decent
conditions
of living,
you will
be *totally*
safe*

*official announcement by the
greek government

In fact on Lesbos more than 7400 people are forced to live in overcrowded camps in inhumane conditions. They are living in tents flooded by the rain, neither having access to sanitation nor to education, psychosocial services or informations about their asylum procedure.

The tolerance of these conditions suggest that this humanitarian crisis is part of concrete policy, not an accident.

We call the greek government and all european countries to institute the necessary measures to protect the health of all based on the respect of human rights and dignity.
